Available for curricular internship (450 hours) · On-site / Hybrid / Remote

SUMMARY

Computer Engineering undergraduate at the University of Florence seeking a curricular internship to complete my degree program. Passionate about backend development and data pipelines, I deliberately integrate modern AI tools to accelerate code scaffolding and prototyping, while maintaining rigorous ownership of architectural logic and system requirements. Alongside software development foundations, I bring practical troubleshooting experience across PC hardware, Linux server environments, and network equipment.

TECHNICAL SKILLS

Languages	Python, Java, C, C++, SQL · Web basics: HTML, CSS, JavaScript
Software Engineering	Object-Oriented Programming (OOP), Data Structures & Algorithms, AI-Assisted Prototyping, Git
Backend & Data	REST APIs, Databases (SQL, MongoDB), Data Collection & Script Automation, Linux Server Ops
Hardware & Networks	PC/device diagnostics and assembly · Cabling and setup of radio links & FWA systems

TECHNICAL PROJECTS

Odds Shield — Data Collection & Monitoring Prototype	2024 – 2025
Independent software project · oddshield.com	
- Designed a software platform for automated data monitoring and statistical anomaly detection on high-frequency streams. Data pipeline: Built concurrent Python scripts for extraction and low-latency filtering across multiple external endpoints. Backend: Implemented RESTful services in Java with persistence handling in a NoSQL database (MongoDB). Methodology: Integrated LLMs to accelerate component prototyping, code scaffolding, and dashboard views. Deployment: Configured and deployed independently on a Linux VPS (Hetzner, Nginx, Supervisor).	

ACADEMIC RESEARCH & STUDY

Data Collection and Suspicious Pattern Detection	2025
University of Florence — Computer Science Lab · Advisor: Prof. Pietro Pala	
- Applied statistical models (percentage variance thresholds and linear regression) to detect anomalies in unregulated market data. - Aggregated and evaluated data pipelines to isolate high-priority alerts against fraud detection reference baselines.	

WORK EXPERIENCE

Administrative & Front-Office Support	2019 – 2024
Cecilia Amadori Dental Practice	
- Handled patient scheduling, public relations, entry-level bookkeeping, and customer invoicing. - Multi-year operational track record: attention to detail, punctuality, autonomy, and confidentiality.	
Apprentice Network Technician (FWA)	May – Jun 2019
TCE Telecomunicazioni S.r.l.	
Assisted in installing, aligning, and cabling fixed wireless access (FWA) radio links and verifying physical network terminations.	

EDUCATION

BSc in Computer Engineering (L-8)	Exp. Jan 2027
University of Florence — Technical-Applied Curriculum	
Python Programming MOOC (Advanced)	2025
University of Helsinki	

GENERAL INFORMATION

Languages: Italian	English: B2 (CLA UniFI)
Driving License: EU Category B	Mobility: On-site / Hybrid
Interests: Socio-economic and technology geopolitics, local history of Elba Island, trekking.
