

Gabriele Berti

Junior Software Engineer · Backend & Data · Real-Time Systems

Rio, Isola d'Elba (LI), Italy +39 388 978 6937 gabrieleberti1801@gmail.com linkedin.com/in/gabriele-berti18 github.com/G4bar

Available for curricular internship · on-site (relocation) or fully remote

PROFILE

Final-year Computer Engineering student at the University of Florence, seeking a curricular internship in software or data engineering. Approach grounded in Software Engineering and **Spec-Driven Development (SDD)**: I use AI as a productivity multiplier while keeping strict control over architecture, interface contracts, and requirements before code. I dig into business models and application domains to deliver solutions tied to business value; I also bring solid hands-on skills in hardware diagnostics and network equipment.

TECHNICAL SKILLS

Languages	Python, Java, C, C++, SQL · web basics: HTML, CSS, JavaScript
SW Engineering	Spec-Driven Development (SDD), AI-Assisted Engineering (architectural control over LLM-assisted code), OOP, Algorithms & Data Structures
Backend & Data	REST APIs, MongoDB (NoSQL), concurrent multi-threaded scraping, anomaly detection & quantitative analysis, Linux servers
Hardware & Networks	PC/laptop/smartphone assembly & diagnostics · cabling and FWA system installation

TECHNICAL PROJECTS

Odds Shield — Anomaly Detection System	2024 – 2025
Independent software project · pilot phase completed · oddshield.com	
- Platform for real-time monitoring of high-frequency data streams and detection of anomalous statistical patterns to protect data integrity. Data pipeline: multi-threaded Python scrapers from 8 international providers (1,000+ concurrent markets), alerts with < 1 s latency. Backend: REST API in Java and persistence on MongoDB (replica set). Method: Spec-Driven Development and AI-assisted coding for components and monitoring dashboards. Infrastructure: self-managed production on Linux (Hetzner, Nginx, Supervisor).	

ACADEMIC RESEARCH

Data Collection and Suspicious Pattern Detection in Asian Betting Markets	2025
University of Florence — Computer Science Lab · Supervisor: Prof. Pietro Pala	
- Dual-factor statistical methodology (% variation threshold + linear regression and R² index) for anomalies and suspicious patterns in unregulated markets. - Validation with industry experts: 421 high-priority alerts, 37 confirmed cases (8.8% precision, in line with fraud-detection benchmarks).	

WORK EXPERIENCE

Organizational Support & Front Office	2019 – 2024
Cecilia Amadori Dental Practice	
- Calendar management, public-facing relations, basic accounting and invoicing. - Five years of operational experience: precision, problem solving, confidentiality, and reliability.	
FWA Network Technician Apprentice	May – Jun 2019
TCE Telecomunicazioni S.r.l.	
Installation, alignment, and cabling of radio links and FWA systems; commissioning of physical network terminations.	

EDUCATION

BSc in Computer Engineering (L-8)	Exp. Jan 2027
University of Florence — Applied Technical Curriculum	
Python Programming MOOC (Advanced)	2025
University of Helsinki	

GENERAL INFORMATION

Languages: Italian (native)	English: B2 (CLA UniFI)
Driving license: B	Mobility: relocation / remote
Interests: socio-economic and technological geopolitics, local history of Elba Island, hiking.
